HONGRONG, SEPTEMBER GTH. 1878.

WHERE are the Inspectors of Nuisances? asks a correspondent. What are the authorities doing in regard to the sanitation of the colony? may also be pertinently asked at the present time. In their reports on the health of the troops here the military medical officers have commented strongly on the sewerage cleansed.-Yours, &c., of Hongkong, and although at the time we took exception to what we considered the too extravagant terms; made use of in regard to it, it must be admitted that there is only too good ground for complaint. Certain localities of the town are which they rightly deemed they were entitled. notoriously unhealthy on account of defective drainage in the neighbourhood, and at every ebb tide a wide extent of reeking muid, in their own. Their prayer was granted, and the great part sewage pure and simple, is left gusting and the danger to health is almost too patent to call for comment. Year by year the infrequent? The watchmen might be European, mud silts up by the Praya and the water to the Indian, or Chinese: A couple of watchmen to same extent recedes, now leaving the drains at low water to empty themselves on a beach the present time, and men might be distributed in which, not very many years ago, was never dry. This change in the natural condition demands a corresponding change in the drainage system. It would not be difficult, we imagine, to find a remedy if the officials in the Sur. veyor-General's department would only apply themselves to the matter. Among other means which suggest themselves either the drains might be carried further out into the practice generally observed here by the foreigners. harbour or an offective system of traps be adopted so that they should only discharge themselves when there is plenty of water to. carry off the sewage. Something certainly rities, however, who are apparently callous on this matter. Curiously enough the Victoris Recreation Club have their swimming bath at a spot where a peculiarly odoriferous drain empties itself, and sometimes sewage matter brought down in a solid state is to be seen floating about even within the bath itself, while just outside it is common enough. We think the committee might advantageously enter upon the consideration of this question and see whether something could anot be done to remove the nuisance. To return to the drainage question itself. however, we would call attention to the fact that this is the time of year when epidemic ANOTHER CASE OF CULTING AND WOUNDING: disease is most apt to be generated by de- Matheson with cutting and wounding a man within the jurisdiction of the Kieto Fu. Even the police might come under the control of such a body, in which case we fancy measures would be taken to prevent the frequent recurrence of burglaries now becoming one of the features compiled from the BEST and MOST RELIABLE of Hongkong life. Such a system, we think, Bources, and no pains have been spared to would be found more satisfactory than our present system of Government through " departments."

Norming is easier than to pick out portions of a statement and make it appear to bear different construction to that which it really conveys. The real question at issue between ourselves and our contemporary was this: The Mail asserted that flogging had been abolished; we denied that such was the case. We certainly thought at one time that the punishment had been suspended for a short time, but the note appended to the Government return published by our disingenuous contemporary corrected this impression. Hence the seeming trivial inconsistency. The attempt to divert attention not avail. The charge of adding insult to injury is not worthy of consideration. It is easy to see where the shoe pinches-our contemporary is unable to dony the charge

INDUSTRIAL EXHIBITIONS IN KIOTO.

y the most of your renders will recollect, in 1872, pursuant to an order from the general government. As might be expected, at first the local government appear to have had but a vague idea of the roal object to be obtained, namely, to make the exhibitions essentially industrial in their obaractor, and not merely sources of amusemont. The progress in consequence has not been so marked as many perhaps would expect, but the outturn thus far has not been altogether barren in results of a beneficial character. Conelderable improvement has been made in the manufacture of the textile fabrics. One of the chiestions to Japanese silks his been that they are too parrow to suit the foreign market. This objection has been removed by the "Shokoba," an institution under the patronage of the local government, which has some eighty hand looms of French pattern in operation and employs about a hundred workmen. POSTAL NOTIFICATION. Arrangements having been concluded for the establishment of a Money Order system between this Colony and the Straits Settlements, His Excellency Governor Pope Hennessy, C.M.G., is pleased to order (under Section XII. of the Post Office Ordinance, 1876) that the issue of Money Orders on the Straits Settlements shall commence in this Colony from the 22nd instant, and that the rates of commission and exchange shall be those mentioned in the following notice.

By Command J. M. PRICE, Acting Colonial Secretary. Colonial Secretary's Office. Hongkong, 16th July, 1878.

With regard to the above, the following Information as to Money Orders is published for general information :-1 .- Money Orders on the United Kingdom and the Straits Settlements are issued at Hong. kong, Shenghai, and Yokohama. Shanghai and Yokohama also issue on Hongkong and vice

2,—Small sums may be remitted between the other Ports by means of Postage Stamps. 3 - Many Money Orders are supplied to residents at the smaller Ports in this way. An application for an order\* is filled up, and is onclosed with a stamped, directed, and unscaled envelope to the Postmaster at the nearest issuing Office. The application must be accompanied with the full amount (including commission) in Cheque, Postage Stamps, or other equivalent of cash, and a little margin should be left for variations of exchange. The Postmaster issues the order, sends it on in the envelope, and returns the change, if any, by first opportunity, with a receipt for the letter, if it were to be registered, as it always should be. Cars should be taken tosend these applications in time, as the Money IN SATURDAL, the lath September, 1878, Under Ullices close some hours before the

at Noon, the Company's Steamship partures of the Mails. 4.—No Order must exceed £10, or include any fraction of a penny. Orders will be drawn at the ourrent rate of the day! and paid at the rate of the day when the advice arrived. The Commission is as follows :---

ORDERS ON THE UNITED KINGDOM. 18 Cents 36 Cents. 54 Cents. Up to £7 72 Cents.

LOCAL MONEY ORDERS (including Straits. Settlements). 15 Cents. Up to \$25 ..... Un to \$50 ....... 30 Cents. 5.—Lists of Money Order Offices in the United Kingdom may be consulted at Hongkong, Shanghai, and Yokohama.

6.—Names must be given in full (except when there is more than one Christian name) but the name of the Payee need not be given if the order be crossed). It can then be paid only through a Bank, and may afterwards be specially crossed to any Bank. 7.—No Order can be paid till the Payee have signed it in the proper place. An Order can be transferred to another Office on payment of an

additional commission. In case of loss of an order, necessity for stopping payment, or the like, application should be made to the nearest Money Order Office for instructions. 8.—If the Order be not presented within six months, an additional commission will be charged; if not within twelve months, the money will be

forfeited. When the order is once paid no further claim can be entertained. 9 .- No Order can be paid until the advice relative to it has been received.

POSTAL NOTIFICATION. Information having been received by His Excellengy Governor Popo Hennessy, C.M.G., of the antry of Canada on the 1st instant into the General Postal Union, it is notified that from that date the postage to be charged on correspondence for Canada will be according to the rates in force for Union Countries generally, viz. - Lottor, per 2 oz., 12 Cents; or via Brindisi only, 16 Cents. Registration, 8 Cents; or via Brindiei, 8 Cents. Newspapers and Prices Current, 2 Cents; or via Brindisi, 4 Cents. Books and Patterns, per 2 oz., 4 Cents: or via Brindisi, 6 Cents. All correspondence for Canada is sent via San Francisco unless specially otherwise directed.

By Command. J. M. PRICE, Acting Colonial Secretary. Colonial Secretary's Office. Hongkong, 3rd July, 1878.

Many boxes of letters are received at the Post Office not sealed, that is to say, the box is fastened with sealing wax, but there is no impression of a seal. The attention of boxholders is called to the necessity of carefully sealing such boxes with some recognisable seal, and of sending a chitbook or receipt with them. The omission of the latter precaution leaves a doubt as to whother the contents of the box ever reached the Post Office; the omission of the former, as to whether part of them might not have been ab-

stracted for the sake of the Postage Stamps.

In the ornamentation of procedain, the genius of the Chinese has attained its loftiest pitch. Not only are single pieces very rich in decorative effect; not only is there on other pieces really admirable painting of flowers, birds, and figures—the most wonderful part of their china-painting is its bound: less variety, and the inexhaustible fertility of invention which a large collection displays. They excel in combining scrolls and cartouches of all imaginable shapes, on grounds of geometrical construction; seeming to be disposed as if by chance, and yet revealing a wonderful intuition of mathetic symmetry to move these the tenth of an inch from the position assigned them by the artist would the former has proved so satisfactory, the tinuous membrane. He was now as active beholder's eye. Father D'Entrecalles tells be to destroy the spell that rivets the us that the widest division of labour prevails in the Chinese manufactories, the occupation of one man being, for instance, merely to form the first coloured circle near the edge of the porcelain, while another sketches flowers which a third paints; one outlines the water, another the mountains, a third the birds, which again are all painted by special artists. No wonder, with such a method, that all individuality disappears, and that the usually such a bore that we overlook his wit Tottery exemplifies so great a uniformity of inch, or armour-piercing guns.
